

EPOS TAPE[®]

We at Epos Tape committed ourselves to provide you the best kinesiology tape, no matter whether you're a professional athlete, amateur or pursue your very own goals, we'll be glad to expand your horizon.

ORIGINAL KINESIOLOGY TAPE | CROSS TAPE | DESIGN TAPE

A male athlete is shown from the back, in a dynamic pose with arms extended. He is wearing dark athletic shorts with "Columbia" branding on the waistband. His back and shoulders are covered with red and yellow kinesiology tape. His right arm has a black band with "EPOS TAPE" repeated. The background is black, and the text "IMPROVE YOUR PERFORMANCE" is centered over the image.

IMPROVE YOUR PERFORMANCE

ABOUT US

In today's highly competitive world where you only train with the best equipment, use the best technique, watch every step, why would you make a compromise on your kinesiology tape? Don't, use **EPOS TAPE**, because sometimes supposedly small things can make the difference between first and second.

Through our own production site and laboratory in South Korea we are able to ensure superior quality in everything we do. All our tapes and materials are produced in South Korea under a strict quality management.

We at **EPOS TAPE** committed ourselves to provide you the best kinesiology tape, no matter whether you're a professional athlete, amateur or pursue your very own goals, we'll be glad to expand your horizon.

HIGH QUALITY ADHESIVE

- Hypo allergic
- Skin friendly
- Acryl based

HIGH QUALITY FABRIC

- Highest quality standards
- Latex free
- Highly resilient

WHAT IS TAPING?

By lifting the skin, **EPOS KINESIOLOGY TAPE** secures space for blood and lymph to flow smoothly again, allowing contusions and congestions to heal quickly. Another important aspect of **EPOS TAPE** is pain reduction. Our body can only accept one stimulus at a time and doesn't process further stimuli around the spinal cord once one has been taken into our body. Once applied, **EPOS TAPE** will constantly stimulate the sense of touch, which is processed faster than the sense of pain. Because of this, the sense of touch reaches the spinal cord first, blocking off the sense of pain. We feel less pain.

EPOS TAPE also gives your body more stability by supporting it with its elasticity of 40%. This elasticity is equivalent to that of the human epidermis providing an ideal grade of support. You can think of **EPOS TAPE** as a second more resilient skin.

Long Story Short

It lets you recover faster, can correct false and relieving postures and increases your performance by supporting joints and muscles. Also it can be used for cosmetic purposes such as curing bruises and wrinkles.

PHYSIOLOGICAL EFFECT OF EPOS

EPOS TAPE features a special adhesive with a wave pattern design and an elasticity which is similar to the human skin.

This offers a gentle and effective approach to the re-education of the neuromuscular system, the improvement of blood/lymph circulation and the relief of pain. Providing comfort and stability to your body.

EPOS PRODUCTS 01.

ORIGINAL KINESIOLOGY TAPE

For our premium quality tape we only use best materials.

The high quality cotton fabric makes EPOS TAPE breathable and comfortable to wear. Due to the cautiously selected acrylic hypo allergic adhesive it is water-resistant, highly robust and skin friendly. Not to mention that EPOS TAPE is completely Latex free.

All our tapes are manufactured in South Korea under highest quality standards. Providing you with nothing but the best equipment.

Having an elasticity of 40% EPOS TAPE is designed to fit comfortably, and will not restrain the body's range of motion. Due to our special skin friendly

adhesive EPOS TAPE keeps irritations to a minimum, even on sensitive skin and the wave style adhesive pattern ensures an improved ventilation as well as effectiveness.
